

Solar Sal Boats

100% Solar Powered since 2005

US Patent No. 10,875,608

Innovative modern designs make our solar electric marine propulsion practical.
Solar panels continuously charge the batteries.

New in 2021: Solar Sal 24, our first fiberglass model

Current Models:

Solar Sal 25

Solar Sal 27

Solar Sal 40

Solar Sal 44 – AKA – Solaris

1st US Coast Guard Certified

100% Solar Electric Commercial Boat

All Solar Sal Boats Feature:

Carbon-Free Boating:

All solar electric – No carbon emissions, no fuel or charging docks

No gas, diesel or oil to burn or spill

No water pollution

Made in America – motor and battery options include Made in New York

Better Health:

Quiet, no vibration

No fumes, no toxic gases

Low radiated underwater noise

Better Boating Experience:

Quiet – enjoy conversation and the sounds of nature and water

Smooth – displacement stability

Easier docking – continuous propeller power from 0 RPM

No dangerous AC power, no range anxiety*

Low Maintenance and Operating Costs:

Free fuel forever

No fossil fuels, no oil changes

No underwater through hulls

Not hybrid and no plugging in required

*Note: All boats have fuel “tanks”. Anyone can run any device out of energy – your boat, your car, airplanes etc. But daytime solar can keep you going and charge your batteries; your mileage will vary.
